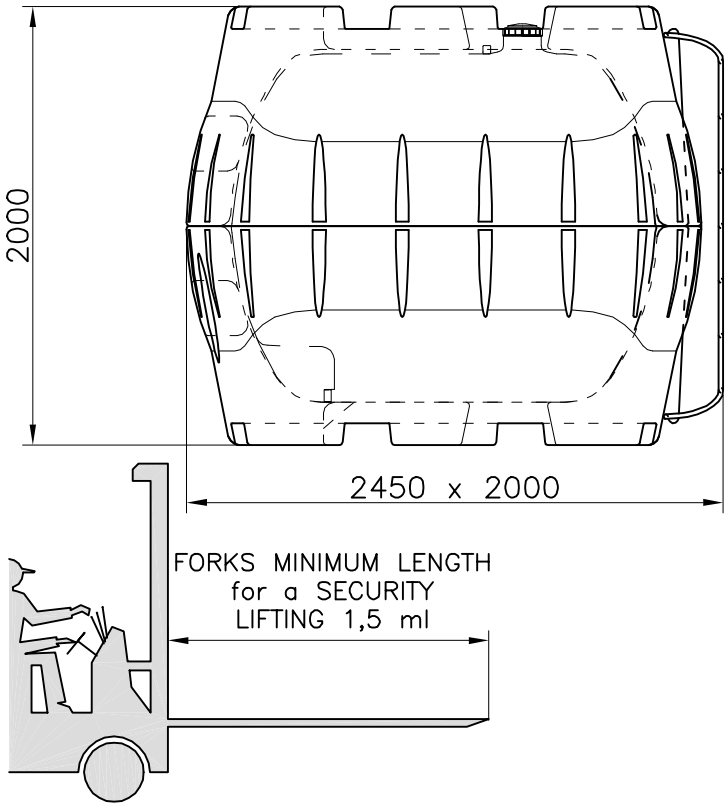
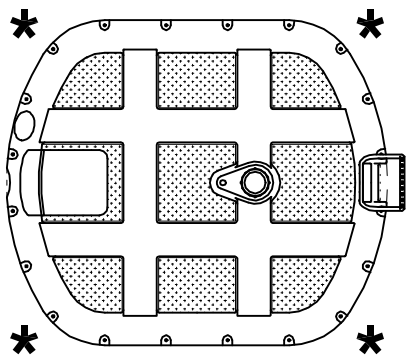
TS 30/ONU - GUIDE TO USE

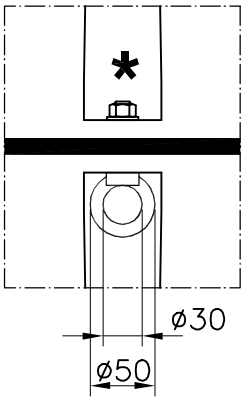


B E C A R E F U L !

HANDLING with FORK–LIFT TRUCK

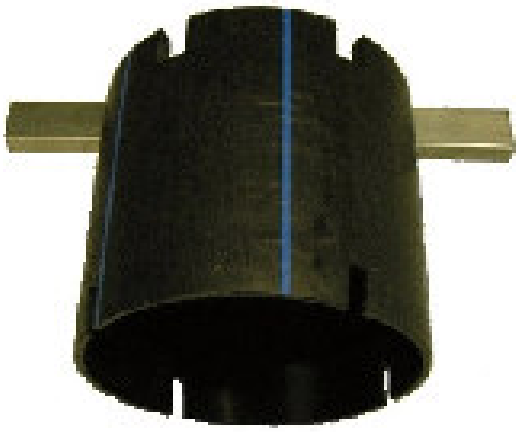
To enliven the homologated GIR TS 30/ONU by fork–lift truck, is necessary for this to be supplied by forks with **MINIMUM LENGTH OF ML 1,5 (BETTER IF ML 2).**





BLOCKING ON TRUCK

To block the homologated GIR TS 30/ONU on a truck, it can be used some "belts" hooking them to appropriated "blocking rings" placed into tank corners (*).



LID (CPF 150) CLOSING/OPENING KEY

Necessary for the perfect closing of the lid during the transport and opening the same one during the emptying (to avoid the tank implosion risk).
